

To start press the GO button to get an exchange problem. Then start with 0. Now for the three pairs of pieces, if the first piece is white, then subtract the value. If the first piece is black then add. Continue by subtracting white pieces and adding black pieces until you have reached the sixth piece. You should then type the result of the six arithmetic operations into the middle box and press the ANSWER button to find out if you have figured correctly. Then you can start with a new problem by pressing the GO button and keep repeating for practice. Press the back arrow button to get back to the game page.
